EBSCO Information Services

EBSCO Health provides NHS members with CINAHL and Medline. CINAHL is the most widely-used research tool for nurses and allied health professionals globally. MEDLINE is the U.S. National Library of Medicine® premier bibliographic database.

We also provide services to answer clinical questions at the point of care for nurses, allied health professionals and clinical staff with DynaMed, Isabel, Nursing Reference Center Plus and Dynamic Health.

Option Grid and HealthDecision provide shared decision-making support tools enabling clinicians and patients explore medical options together.

E-books and journals are available to complete your healthcare portfolio, all delivered through EBSCO Discovery Service and Stacks.
